

Project Design Phase-II

Customer Journey Map

Date	31 July 2026
Team ID	Team 1
Project Name	Employee Software Installation Request through Service Catalog
Maximum Marks	4 Marks

Customer Journey Map:

A Customer Journey Map visualizes the end-to-end experience a user has while interacting with a product or service across distinct stages, capturing their steps, interactions, goals, emotional highs and lows, and opportunities for improvement at each stage.

Stage –	Entice	Enter	Engage	Exit	Extend
Steps	Realizes software is needed for work	Opens Service Catalog, finds the item	Fills form, submits; manager approves	IT installs the software	Confirms install, resumes work
Interactions	Colleagues, IT documentation	Service Catalog portal	Catalog form, My Approvals (manager)	Catalog Task, IT technician	Email notification, My Requests
Goals & Motivations	Help me find where to request software	Help me submit a complete request fast	Help me know my request is progressing	Help me get the software installed soon	Help me confirm it's done
Positive Moments	Guided catalog form is easy to find	Form only takes a couple of minutes	Manager approves quickly via My Approvals	Task is clearly assigned, no back-and-forth	Confirmation email gives closure
Negative Moments	Unsure who to ask before this existed	Unsure which variables are mandatory	No visibility while waiting for decision	No ETA communicated for installation	No follow-up if issues arise post-install
Areas of Opportunity	Promote the catalog item internally	Add inline help text to form fields	Show live status on My Requests	Add estimated completion time to task	Add a quick feedback prompt after closure
