#### Data Flow Diagrams:

A Data Flow Diagram (DFD) is a visual representation of the information flows within a system, showing how data enters and leaves the system, what changes the information, and where data is stored.

#### DFD Level 0 — Software Installation Request

#### User Stories

Use the below template to list user stories for the solution.

| User Type | Functional Requirement (Epic) | User Story Number | User Story / Task                                                                                                                                                                  | Acceptance Criteria                                       | Priority | Release  |
|-----------|-------------------------------|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|----------|----------|
| Employee  | Request Submission            | USN-1             | As an employee, I can submit a software installation request via the Service Catalog by filling software name, version, justification, device, license type, and required-by date. | Request is created with all fields captured correctly     | High     | Sprint-1 |
| Employee  | Request Submission            | USN-2             | As an employee, I will receive a confirmation once my request is submitted.                                                                                                        | Confirmation is visible on submission                     | Medium   | Sprint-1 |
| Employee  | Status Tracking               | USN-3             | As an employee, I can view the current status of my request under My Requests.                                                                                                     | Status updates reflect Requested/Approved/Rejected/Closed | High     | Sprint-1 |
| Manager   | Approval                      | USN-4             | As a manager, I can                                                                                                                                                                | Pending requests are                                      | High     | Sprint-1 |

|                   |             |       |                                                                                                              |                                                                          |        |          |
|-------------------|-------------|-------|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|--------|----------|
|                   |             |       | view pending software requests assigned to me under My Approvals.                                            | listed with relevant details                                             |        |          |
| Manager           | Approval    | USN-5 | As a manager, I can approve or reject a request with comments.                                               | Decision updates the request state and notifies the employee             | High   | Sprint-1 |
| IT / Network Team | Fulfillment | USN-6 | As an IT team member, I receive a Catalog Task automatically when a request is approved.                     | Task is created with correct assignment group and details                | High   | Sprint-2 |
| System            | Escalation  | USN-7 | As the system, I automatically raise an Incident when a request cannot be fulfilled due to license shortage. | Incident is created and assigned to Software Support with no manual step | Medium | Sprint-2 |
