

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	31 July 2026
Team ID	Team 1
Project Name	Employee Software Installation Request through Service Catalog
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

This template was used to brainstorm approaches for automating the employee software installation request process, and to prioritize the resulting ideas before finalizing the solution direction.

Reference: <https://www.mural.co/templates/brainstorm-and-idea-prioritization>

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Problem Statement: "How might we enable employees to request licensed software installation in a structured, trackable way — with automatic manager approval and IT fulfillment — instead of relying on informal email requests?"

Step-2: Brainstorm, Idea Listing and Grouping

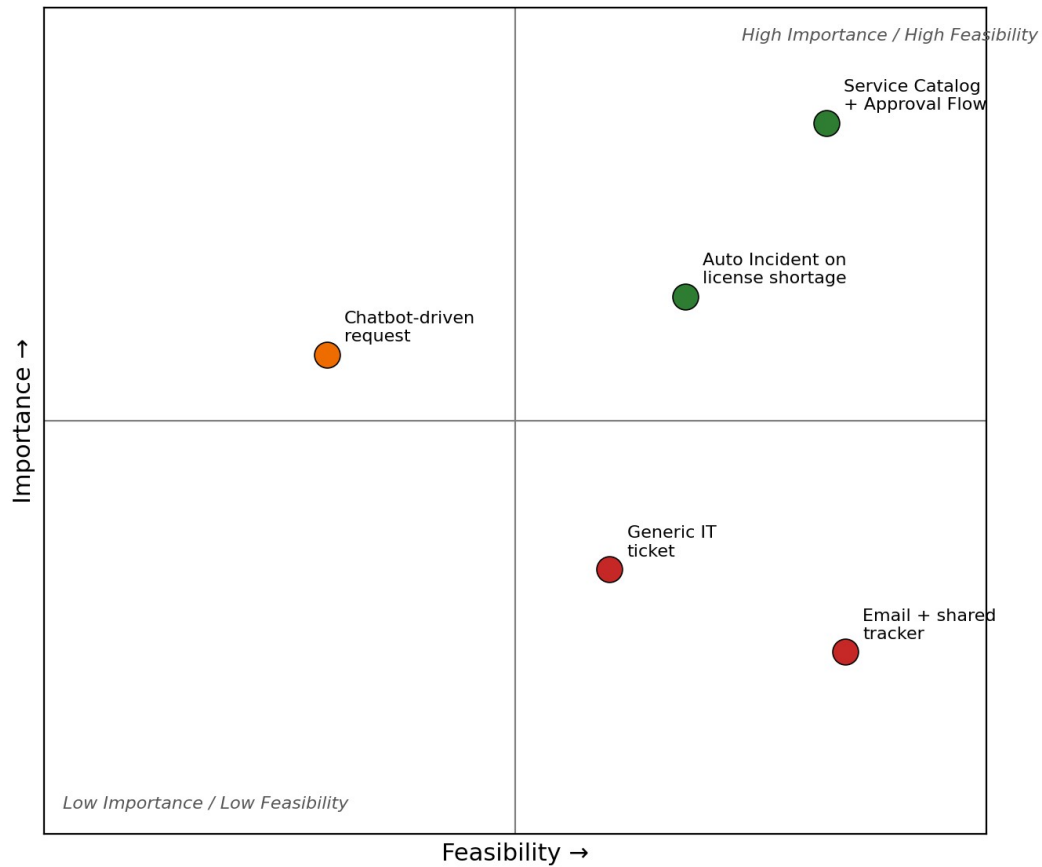

Ideas generated during the session were clustered into four themes: Request Intake, Approval, Fulfillment, and Escalation.

Brainstormed Ideas — Grouped			
Request Intake	Approval	Fulfillment	Escalation
Email + shared tracker	Verbal approval	Manual IT follow-up	No shortage handling
Generic IT ticket	Email approval chain	Auto-created Catalog Task	Manual escalation email
Service Catalog form	Native Approval Engine (Flow Designer)	Chatbot-driven request	Auto-created Incident on shortage

Step-3: Idea Prioritization

Each idea was plotted against Importance and Feasibility to decide which to carry forward. Ideas in the top-right quadrant (high importance, high feasibility) were selected for the solution.

Idea Prioritization Matrix

Selected approach: Build a ServiceNow Service Catalog item for software installation requests, with an automated Approval Flow (manager approval), Catalog Task creation on approval, and an automatically raised Incident when a request cannot be fulfilled due to license shortage.
